

Mrs. Purvis and Mrs. Kerr Women's Doubles Champs

After a hectic three-set match that was bitterly contested all the way, Mrs. Purvis of Coleman and Mrs. Kerr of Blairmore, were the winners of the ladies' doubles in the Southern Alberta tennis tournament at Lethbridge yesterday from Mrs. H. Moore and Mrs. J. Graham, of Lethbridge.

The Lethbridge players took the first set in fairly easy fashion, winning 6-1. In the second set the visitors turned the tables and, by consistent, careful playing succeeded in capturing the contest 6-2. The last set was hotly contested but The Pass team away from the Lethbridge players, winning the set 6-2 and with it the match and championship of the ladies' doubles class.

Waterton Loses To Coleman 7-4

Coleman, by hitting freely in the eighth inning to check up four runs, was enabled to defeat Waterton last Sunday afternoon at Waterton, by the score of 7-4. Both teams were fairly evenly matched and Parker for Waterton and Beaver for Coleman pitched good ball throughout.

The game opened with Parker striking out seven men in succession, eight in the first three innings. Coleman simply could not understand him. Meanwhile the Waterton team managed to make two runs. By the beginning of the eighth the score stood 4-3 in favor of Waterton. The break came then, when three hits in succession put three on base for Coleman. Bleks provided to bring one in on a sacrifice hit. Pyverell hit and brought in the second run, and then Kelly with a two-bagger enabled two more runs to be made. Afterwards Waterton was unable to score, only registering one hit off Beaver in the next two innings.

Parker checked up 19 strikeouts, but Beaver was close behind with 16. Waterton made seven hits to Coleman's 11, and five errors to Coleman's six—Lethbridge Herald.

Father—Ye were seen at the picture the night w/ that lassie McClean?

Son—Ayel She had two free tickets.

Father—That's a' richt then. Only feared there was a catch in it.

Rev. D. K. Allan In- ducted at Westlock

The Rev. D. K. Allan, formerly of Coleman, but now of Westlock, was inducted into the pastorate charge of Westlock, Clyde and Pibroch on Tuesday evening, July 20th, a large congregation being present for the ceremony.

The Rev. Principal Miller and the Rev. A. C. Farrell of Edmonton conducted the service, which was a most impressive, instructive and interesting one.

The Rev. A. C. Farrell inducted the new pastor after he had answered the customary questions. 'Dr. Miller addressed the minister and the Rev. Mr. Farrell the people.

Mr. Allan as the first minister of the United Church in Westlock, began his ministry among a loyal and enthusiastic people at the close of the induction service.

Mrs. Allan was called to the front and presented with an exquisite bouquet of red and white carnations, Miss Betty McEwen, on behalf of the congregation, made the presentation. Mrs. Allan suitably replied.

A real social half hour with a splendid program of song was enjoyed by all.

The Rev. and Mrs. Allan and family are being warmly received not only into the Church, but also into the community.

Sells Floto Circus

More than 400 arena stars are required to round out the program of the Sells-Floto circus, which is billed to appear in Blairmore on Thursday, August 5th. This big show, long considered as the "class" of the circus world, will doubtless attract hundreds from this place.

An added attraction this year is Buffalo Bill's Wild West Show, with a large number of full-blooded Sioux Indians.

Noted this year as among the performers is the famous "Poodle" Hannaford and his comedy riders. Hannaford is known far and wide as the greatest circus performer in his special line in the world. Others whose fame is widespread are the Flying Wards, the Sells-Floto clown army, the three herds of performing elephants, included in which are the only elephants who give an exhibition of the now famous "Charleston," and said to be perfectly trained in this novelty.

There are also the 60 Liberty horses, half a hundred performing lions, tigers, leopards, polar bears and others, the programs given by each and by the mixed groups being thrilling and exciting in the extreme.

Practically two hours is given over to the performance in the main tent, and the three rings, steel arena and stages are filled with action every minute of the 120. The opening spectacle is a pagant of color and beauty and serves to introduce the 1,000 people to the audience.

Sells-Floto is the exception among circuses, being absolutely clean, and being at the same time exclusively a circus that has retained the features that make performances of this kind enjoyable to every person who attends. Two performances will be given, the first at 2 p. m. and the second at 8 p. m. Sells-Floto has not raised the price of admission from its always popular figures, another thing that has made it popular with the masses.

Mr. and Mrs. James Ford were visitors to Waterton Lakes over the week-end.

LOCAL, PERSONAL AND GENERAL NEWS

Mr. G. Leisner, of Didsbury, is on a visit to his sister's husband Mr. H. Wilton Clark.

Miss Ines Dunlop, of the Nicola Hospital, Merritt, B. C. is spending a month's vacation with her mother, Mrs. C. S. Dunlop.

Don't forget the Presentation and Dance in the Coleman Crystal Arena to-morrow night (Friday). Admission free.

Mrs. and Mrs. J. C. Lang returned to Coleman on Tuesday morning after spending a month's vacation at the Coast and in Ontario.

Unique Compliment

A unique compliment was paid to the Newsboys' Band of Edmonton last week, when the famous Coldstream Guards Band broke precedent and massed with the Newsboys organization for a massed band concert on the final evening of the Edmonton Exhibition. The Newsboys' Band which played at Wembley in 1924, gave a splendid exhibition in their playing with the famous British band.

Mrs. W. S. Purvis left on Sunday night's train for Lethbridge, where she will take part in the annual Tennis Tournament of that city.

Word was received this week that Miss Vera McDonald and Miss Gladys Price had successfully passed their examinations in Composition and Chemistry respectively.

Miss Doris Davies, of Edmonton, is spending her vacation at Bryan City with Miss Margaret Badham. Both young ladies expect to visit Coleman together in the near future.

Mrs. F. H. Graham returned on Saturday last from Edmonton, where she had been spending a short vacation.

Fined \$5 and Cost

The four boys who were caught last week throwing rocks at the tents in the tourist camp, and using profane language were taken up before Judge Gresham and fined \$5 and costs, in default one month, and six months suspended sentence.

The many friends of Mrs. D. K. Allan will regret to hear of the death of her aged mother. She passed away on Saturday, July 7th, at the ripe old age of 96 years.

U. S. Farmers Coming to Canada

Marked activity in the movement of agricultural settlers from the United States to Canada is noted by the Dominion Government department of immigration and colonization. In the month of June 195 settlers, who with their wives and families represent 312 persons, came into Canada from Fargo, North Dakota, bringing with them cash and effects to the value of \$495,550. The Canadian National Railways colonization officials at St. Paul, Minn., were responsible for a large number of these former settlers emigrating to the Canadian prairies.

Mrs. J. L. Lonsbury, Mr. A. Lonsbury, Mr. and Mrs. J. Nash and family, spent the week end at Waterton Lakes.

Mr. Luke Lindoe left Saturday evening for Lethbridge where he will take part in the annual Tennis Tournament.

Coleman Wins Over Michel

In a Crow Baseball league fixture between Coleman and Michel played on the local diamond on Friday evening of last week, the Coleman boys secured an easy win by the score of 14-5 over the visitors. The attendance at the game was very poor considering the class of ball being played by our local boys and it is hoped that at the next game played here the local fans will turn out in full strength.

Mr. Robert Barnes is spending a month at the Sarcee Training Camp, Calgary.

The Journal will be glad to have the names of visitors in town and accounts of various social events, etc., for publication. Our phone No. is 209. If you have not a phone, send it by mail, or hand it in to the Journal office. Your cooperation in the matter of gathering news will be greatly appreciated.

Miss Helen Murphy, of Nelson, B. C., is the guest of Mr. and Mrs. C. S. Oumette this week.

Britain Sees West As Trade Field

"Western Canada is being increasingly regarded by manufacturers and merchants of Great Britain as a promising field for the sale of their products," said A. E. Pollard, newly appointed British trade commissioner at Vancouver, recently. Mr. Pollard was for five years head of the Canadian section of the Department of Overseas Trade, London, and succeeds L. B. Beale, transferred from Vancouver to Wellington, New Zealand.

The Winnipeg Ukrainian girls gave a very pleasant concert in the Grand Theatre on Sunday evening last. The concert was a great success in every way, quite a large number of people being turned away unable to gain admittance.

Miss Margaret Fraser, of Vancouver, B. C., is the guest of her sister, Mrs. F. H. Graham, this week.

Blairmore Wins From Coleman

Another of the inter-club league fixtures to be played on the Blairmore courts was played Wednesday afternoon of last week, when the Coleman Tennis Club played the Blairmore Tennis Club.

There were nine events drawn, but only seven played owing to the fact that Coleman had only one lady player down. Of the events played, Coleman won two and Blairmore five.

An American had been speaking in a superior manner to Englishman, who was very bored.

At last the American said, "Of course you know the English can never see a joke."

"Is that so?" replied the Englishman. "Then will you explain how it is that I have seen you?"

Mr. O. M. Giesse, who recently put over such a successful sale for C. S. Oumette, is back in town again and is conducting a ten day sale for Mrs. H. E. Gate, which commenced yesterday, Wednesday, July 28th.

A successful dance was held in the Coleman Crystal Arena on Saturday evening last.

In spite of the heat and the many diversions and attractions of the holiday season the services at St. Paul's United Church are being well attended. The regular schedule is being followed, morning worship at eleven and the evening service at eight. A cordial invitation to visitors and strangers is extended.

Whose Joke Is It?

The home paper is like the wind; when it doesn't blow the way we want it to blow, we don't think much of it.

How few people know what a joke it is getting out a newspaper. When the editor spills over in his laudations, his readers say he is an easy mark. When he is compelled to skip and all but break his neck in his comment, they then say that he is sore about something. If he publishes original matter they say he is afraid to publish articles from other papers; and if he clips from other papers he is accused of being too lazy to write.

If he stays on the job, he should be out rustling news. If he is out rustling news, he is neglecting business. If he prints contributions, he has induced somebody to say what he's afraid to say himself; if he doesn't print contributions he wants to have the whole say and the paper is full of junk. When you miss the news by "not having time to read it," it never has anything in it and is no good. If, in writing up a local performance, he fails to mention somebody, he "has it in for them."

Really, if everybody knew what a joke it is to run a newspaper they'd all be into it.

WEDDING WILSON-PATTERSON

The marriage of Mr. S. L. Wilson and Miss Agnes Patterson took place on Tuesday afternoon at five o'clock at the United Church Manor. Rev. H. J. Bevan performed the ceremony. The young couple were attended by Mr. Alex. Wilson and Miss Grace Patterson. The wedding supper was served at six o'clock at the home of the bride, where a large gathering of friends of both bride and groom enjoyed a real banquet and spent a very pleasant evening.

16 Nations Represented at Girl Guide Conference

Canadian Pacific liner Malin leaving Canadian Metropolis with Girl Guides.

Representing eighteen nations of the world, a party of twenty-five girls and guides sailed from Montreal recently on the Canadian Pacific liner "Malin" after having attended the International Conference of Girl Guides in New York. When the party arrived at Windsor - Station, Montreal, from Buffalo, a delegation of Montreal officials met them and accompanied them to the pier.

Miss Lydia Lidholm, assistant in charge of the party, said that the members of the delegation had a great conception of the spirit of

Canada and the United States and the world, a party of twenty-five girls and guides sailed from Montreal recently on the Canadian Pacific liner "Malin" after having attended the International Conference of Girl Guides in New York. When the party arrived at Windsor - Station, Montreal, from Buffalo, a delegation of Montreal officials met them and accompanied them to the pier.

Touching on various phases of the conference, Miss Lidholm said that even though representatives from eighteen countries were assembled they found that they had almost identical views on the work and were satisfied that the great friendly feeling that had been created would last for many years and would be

Instrumental in advancing the Girl Scouts Movement through a closer relationship.

At present there are girl scout and girl guide movements in almost every country in the world. In Canada and the United States, while many of the rural districts are showing signs of interest in these organizations, the European party, who arrived in New York on May 5, came to see for themselves the organization systems in force here. They visited Boston, Washington, Detroit, Buffalo, Toronto, and Montreal.

In the Canadian metropolis the visitors were welcomed by Mrs. Q. H. Duggan, provincial divisional commissioner. Mrs. H. M. Marler, divisional commissioner; Mrs. C. Campbell, president Montreal Committee; Mrs. Ross McDonald, district commissioner. There were also a number of guide leaders and captains.

RED ROSE TEA

Red Rose Orange Pkce is extra good. Won't you try it this time?

Have a Hobby

Among the many excellent features of that splendid organization, the Boy Scouts, is the encouragement and development of hobbies. It was recognized by the founder of the Boy Scouts that boys of a certain age invariably group together for their activities, whether in play or work; that the "gang" spirit prevails. And almost without exception these boys individually have some hobby which to them is of absorbing interest and arouses their enthusiasm, although to others it may appear quite unimportant, even futile.

It is part of the Boy Scout programme to encourage boys to adopt some hobby that is really worthwhile, one that appeals to them, and to then help them to develop a hobby to a point where it will prove of real value to them and to their fellow men. Thus the Boy Scouts offer badges for efficiency on the part of its members for an almost innumerable variety of things.

Life is full of instances of men and women who have developed their hobbies to a point where they became the real passion and business of their lives, resulting in important discoveries and inventions and bringing untold blessings to the world, as well as fame and often fortune to the hobbyist.

George Eastman, the Kodak inventor and manufacturer, was a bank clerk and, preparing for a holiday trip he decided to take pictures of places visited to send home to his "widowed mother." In those days, half a century ago, amateur photographers were few in number because the paraphernalia required was bulky and crude and the work of picture taking, developing and printing difficult. Eastman thought it could be simplified and in his spare time in his mother's kitchen made photography his hobby. The result is well known.

Laith Barban's hobby was horticulture, and he amazed the world with his achievements in the development of new plants and flowers and in demonstrating how they could be improved in size and beauty. Jack Miner, Thompson-Ston, and others have made the life and habits of birds their hobby, with the result that mankind has learned how much we owe to the feathered folk, and how, without their help, destructive gophers, weasels and insects would soon lay waste with gardens, orchards and our food supplies. As other men, Johnathon by name, within the past twelve years has, as a hobby, grown all kinds of tropical and sub-tropical trees and plants with the result that he has proven that many things which the United States now imports from foreign lands to the extent of hundreds of millions of dollars can be raised at home.

Many a boy has a mechanical turn of mind which soon finds expression in some form of hobby and which, if rightly directed, encouraged and developed, may point to the occupation in which he may find the greatest enjoyment and success in life.

But apart from hobbies of this character, it is well that the business and professional man and woman should have a hobby. It should be something distinctly different from that of their everyday occupation. Thus the professional officer man will find health, recreation and downright pleasure in devoting his spare time to the development of some hobby which takes him out doors and calls for the use of his hands rather than the concentration of his mental faculties.

There is, fortunately, a growing realization of the value of hobbies, although they are not always classified as such. Service clubs in all cities are more and more turning their activities in the direction of helpful, humanitarian work. They find these Club members making a real hobby out of providing outings for orphaned, under-nourished and crippled children, and finding as much pleasure in doing so as they provide for these littlefortunates.

Hobbies there are such as the collecting of stamps, coins, antiques, china, pictures and other articles too numerous to mention. They all have their place in freeing the mind from too close and constant application to business affairs and worries, even though they may not result in adding anything very worthwhile to the lives of others and the advancement of the world.

The main thing is to have a hobby. Parents should encourage their children in this direction and carefully refrain from sidetracking what may seem silly and purposeless to them. Sympathetic study of a child's hobbies may give a valuable indication of the direction which such child's training should be given.

The Dangerous Speed

Forty-five Miles An Hour Most Dangerous Motoring Speed in Doctor's Opinion

Forty-five miles an hour is the most dangerous speed for motorists, it was stated at an inquest in England by Dr. Eric Gardner, who has been keeping tabs on automobile accidents for years.

When there is a crash at 30 miles an hour, the rider generally escapes with a few bruises, the doctor explained, his contention being that the body was due to the fact that the person's body usually was thrown with such force that it "skipped" or hit the ground, rather than a glancing blow and rolled more or less.

But if something happened when travelling at 45 or 50 miles an hour, Dr. Gardner said, the victim generally was tossed in such a manner that he often landed on his head, suffering serious injuries or death.

"Why do churches take up collections?"

"Devil funds, I guess."

"Not at all! They don't want to make people good for nothing."

SAYS IT WILL BE A PRIVILEGE TO HELP CANADA

London.—"It will be a privilege during the next five years to help Canada achieve her great purpose. I shall do my utmost to ensure the prosperity and progress of the Dominion."

Viscount Willington of Raiton, Canada's new governor-general, made his statement in the course of an address on his new post, at the dinner in his honor given here. The function was attended, among other notables, by the Duke of Connaught, former governor-general of Canada, Sir John L. C. Amery, secretary for the dominions, and Hon. P. C. Larkin, Canadian high commissioner in London.

The Duke of Connaught, proposing the health of Viscount Willington, declared he was confident that the new governor-general would like the Dominion more the longer he lived there. This had been his own experience.

Hon. L. C. Amery supported the toast.

Viscount Willington spoke in the happiest strain of his recent journey to Canada. "The general impression of the Dominion can be expressed in two words," he said, "confidence and optimism. It seemed to me wherever I went that Canada was saying 'we gave our best during the war but we want no thanks because we were only doing our duty; we have passed through a bad time alone but we still see the light shining through the clouds; we are perfectly confident that we shall get through our difficulties. Above all, we are devotedly loyal to His Majesty the King, and determined more and more to become a pillar of support to the mother country and the British Empire.'"

"If I am right in this impression, then I am indeed proud that during the next five years I will be privileged to help Canada achieve her great purpose," he declared.

"I am determined, so far as it lies in me, to do my utmost to ensure the prosperity and progress of the great dominion," he concluded.

Viscount Willington was accorded cheers at the conclusion.

Santa Cruz Snowbound

Sheep and Cattle Herds Suffer Through Cold in South America. Buenos Aires.—Recent alarming rumors concerning the situation in the far south of the republic are more than confirmed through belated official dispatches received by the ministry of the Interior from the governor of the territory of Santa Cruz. It is completely snowbound, and where all communications either are interrupted or cut off.

The governor estimates that 50 per cent of the country's immense sheep and stock herds will be lost unless the snow ceases and the thaw sets in within 10 days.

The thermometer, which for some time has registered 21 degrees below zero, centigrade, shows no signs of rising. This and the governor's predictions has caused a pessimistic effect in wool circles in Buenos Aires.

Warsaw To Paris Flight

Paris.—Lieutenant Thoret, the French aviator, piloting an aeroplane with a wing spread of 20 feet and a 40 horsepower motor, has made a non-stop flight between Warsaw and Paris at an average of 90 miles an hour. The aviator had sufficient gasoline in his tank when he landed to fly to London had he so desired. The "Klondike" consumed 2½ gallons of fuel for each 60 miles flown. Thoret's trip was made with the purpose of making his tour popular. He says flying in the small plane is cheaper than using an automobile.

Lord Willington Congratulated London.—Viscount and Lady Willington were among a distinguished gathering at a luncheon tendered by the British Indian Union, and the Marquis of Reading, former viceroy of India, took the occasion to toast the man who had been appointed to succeed Lord Blyth as governor-general of Canada. The luncheon was held under the chairmanship of the Duke of Connaught, who has himself served as governor-general to Canada.

To Visit U. S.—The Russian delegation to the League of Nations on Intellectual Cooperation, announces that Queen Marie plans to visit the United States this fall. Her Majesty probably will sail from a French port about September 15.

W. N. A. 1629

King to Run in Prince Albert

Accepts Nomination in Northern Riding for Federal Elections. Ottawa.—Right Hon. W. L. Mackenzie King, former prime minister, telegraphed the Liberal Association in Prince Albert, Sask., accepting the nomination for the Liberal candidature in the September election.

At the same time, Mr. King communicated his regrets to the Liberals of North York, who also sought to name him as their standard-bearer.

He pointed out to the latter that he would be compelled to spend most of the time between now and election day in a coast-to-coast campaign and therefore would not be able to return to North York the time and energy necessary to redeem the riding. "I have felt," he adds, "that to enable me to serve the party's interest in the Dominion, I should avail myself of the greater freedom which the acceptance of the nomination by the Liberals of Prince Albert will thus afford."

To Manage Wheat Pool Elevators

C. M. Hall Will Have Charge of Pool Elevators in Alberta

Calgary.—C. M. Hall, manager of the Alberta Pacific Grain Company, has been appointed general manager of the Alberta Wheat Pool elevators. It is officially announced. He will assume his duties on August 15.

Mr. Hall has been associated with the Alberta Pacific Grain Company for the last eleven years. Thomas E. Oliver, also of the Alberta Pacific Grain Company, has been appointed assistant to Mr. Hall. It is not generally known that the wheat pool has already purchased 15 elevators in Alberta and have contracted for building fifteen more which it is expected will be ready for business this year.

Harvest in Northern States

Minnesota and Dakotas Commence to Harvest

Minneapolis.—The northwestern 1925 harvest has begun. Harvesting of small grain is underway in several sections of the northwestern states, and becoming general within a week or ten days.

In southern South Dakota and Minnesota, harvesting of wheat is under way, and some oats and barley is being cut. Central South Dakota and Minnesota farmers will start harvest within a week, while other reports said that some harvesting will open in northern Minnesota and North Dakota within four to eight days.

The first threshing of the season in South Dakota was reported on the Ole Hines farm in the Irene district, near Sioux Falls. Threshing will be general within two weeks.

To Visit Dominion

American National Editorial Association Will Tour Canada

Victoria, B.C.—Bavarian Impressions gained by members of the National Editorial Association of the United States on their periodical visit to Canada has been a means of encouraging an influx of settlers into Western Canada. This was the view expressed here by Wallace Odell, past president of the association, who is leading a party of 150 journalists across the Dominion on their return cast from the 41st annual convention at Los Angeles.

The party will split at Vancouver, about 50 leaving for a trip to Alaska and the remainder wandering at leisure through the Canadian provinces. In the party are five delegates who visited the Dominion in 1924.

Eleven Are Drowned

Lindsay, Ont.—Eleven young men and boys, ranging in age from 16 to 22 years, drowned in the waters of Bass Lake, 85 miles northwest of Toronto, when the war canoe in which they had set out to replenish supplies of their summer camp was capsized. Four members of the party reached land after clinging to the upturned craft for more than five hours.

Ontario Candidates

Toronto.—Eighteen candidates have been nominated in Ontario to date to contest the federal elections, including ten Conservatives, six Liberals and two Progressives. Nominations included the names of John I. Stansell, Simcoe, former Conservative member, in Norfolk; Elgin, and Theo. Rowley, Leamington, Liberal, in Essex South.

May Sell Interest

Dublin.—Minister of Finance Blythe announced in the Dail that the Irish Free State Government proposed to sell the government's interest in the National Land Bank to the Bank of Ireland for £200,000.

Laborite Is Reproved

Jack Jones Is Ejected From the British House. London.—Jack Jones, irresponsible Laborite M.P., figured in another scene in the commons and had to withdraw from the house on the speaker's order.

During the question period some members grumbled because the minister of mines, Lt. Col. G. R. Lane-Poole, was not present, and Jones said: "Is not the real reason that the minister of mines is incapable of answering questions?"

He refused to withdraw the remark, which the speaker declared was grossly improper, and was ordered from the house. Two weeks ago Jones caused a stir when he called Lady Astor a liar. Reproved by the chair he substituted Churchill's phrase "terminological ineptitude."

More Self Discipline

Ramsey MacDonald Says Youth Requires More Discipline Than Ever

London.—Harsh self discipline was urged upon the youth of today by former Premier J. Ramsay MacDonald, addressing a huge throng at a session of the World's Christian Endeavor convention at Crystal Palace. Because of the misery the world was reaping from the sewing of a few years ago, he said, youth required a discipline severer, more drastic and more hardening in spiritual things than had been called for by any generation for a long period. The speech was roundly applauded.

ELECTION DATE ANNOUNCED FOR SEPTEMBER 14

Ottawa.—Canada goes to the polls on Tuesday, September 14, in a speech here, Rt. Hon. Arthur Meighen definitely announced the date. The campaign will be of just eight weeks' duration.

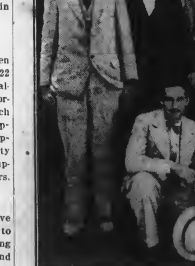

Premier Meighen opened his Dominion campaign here in the Adirondacks. He opened with the charge that in every attempt at initiating important legislation, the King Government had bungled and many times been compelled to reverse its proposals and withdraw its bills. In the main the prime minister dealt with revelations before the customs committee and with the constitutional issues raised by Rt. Hon. W. L. Mackenzie King.

On the customs department issue, the premier said the government of Mr. King had been so buried under the revelations of wrong-doing that it was only natural that Mr. King should choose some other issue. The name of the king's representative had had been passed and the conduct of His Majesty's representative had been flatly challenged by Mr. King on the floor of parliament, "the prime minister had bungled and many times been compelled to reverse its proposals and withdraw its bills. In the main the prime minister dealt with revelations before the customs committee and with the constitutional issues raised by Rt. Hon. W. L. Mackenzie King."

On the customs department issue, the premier said the government of Mr. King had been so buried under the revelations of wrong-doing that it was only natural that Mr. King should choose some other issue. The name of the king's representative had had been passed and the conduct of His Majesty's representative had been flatly challenged by Mr. King on the floor of parliament, "the prime minister had bungled and many times been compelled to reverse its proposals and withdraw its bills. In the main the prime minister dealt with revelations before the customs committee and with the constitutional issues raised by Rt. Hon. W. L. Mackenzie King."

Liquor Agreement With U. S.

Madrid.—The Spanish cabinet has approved ratification of the agreement with the United States regarding alcoholic liquors.

Students Tour in China and Japan

Indicating the great attraction, which "the immortal East" exercises on the Occident, here are a group of happy student boys who are determined to see for themselves what everyone at some time or other talks about and discusses. They are photographed on board the Canadian Pacific liner Empress of Russia and sailed recently on that ship for the Orient from Vancouver in a six week tour of China and Japan under the auspices of the Arts and Crafts Guild. It is at that time they will see many of the famous shrines and cities of the two countries and will come back with a wealth of new ideas reinforced by actual experience of the two greatest examples of the East. They will return to Canada on the Empress of Russia arriving at Vancouver, August 9.

BRITISH TRADE IS DEPENDENT ON PREFERENCE

London.—Third reading of the finance bill was given in the House of Commons after the house had rejected by a vote of 224 to 117 a Laborite motion which would have thrown the bill out.

British trade in recent times has been saved by the amount of British manufactures taken by the dominions and colonies of the empire. Rt. Hon. Sir Robert Horne, former Conservative chancellor of the exchequer, declared in reply to the attack on imperial preference, which is provided for in the bill, by Capt. Wedgwood Benn, Liberal, "the exports to the various parts of the empire represented forty-four per cent of her total trade."

"Does anyone imagine that we could keep these markets without the dominions' preferences?" he asked.

The result of Australia's increasing British preferences was that 53 per cent of her imports were British manufactures. How did Wedgwood Benn anticipate keeping the dominions' preferences if Britain did nothing in return, Sir Robert continued.

He pointed out that there had been propaganda in Canada in favor of reducing or even abolishing the British preferences if Britain did not reciprocate more than she was doing, and he referred to a magazine article, written by him, declaring that if Australia could not be expected to turn a deaf ear to the more favorable offers from other countries if Britain did not reciprocate her preferences to a greater extent.

Poincare To Form Cabinet

Takes Up Task Of Forming Government in France

Paris.—Raymond Poincare, former president of the republic and former premier, will take up the task of organizing a new cabinet to replace that headed by Edouard Herriot, which failed to receive the support of the chamber.

President Doumergue, in deference to the general desire of parliament, the press and public, decided that the time was ripe for a national ministry representing all, or as many parties as possible, declaring that the constitution of the Années of France. He asked M. Poincare to organize such a ministry, and this Poincare agreed to do.

Further Home Bank Claims

Toronto.—The 1,800 claims filed by persons who had more than \$500 on deposit in the Home Bank when that institution closed its doors, are to be taken up at a conference in Ottawa, which L. E. Weldon, liquidator, representing the depositors, left here to attend. There is approximately \$700,000 yet to be distributed to Home Bank depositors, and just what percentage of this the 1,800 claimants will receive may be announced within the next few days.

Government Plane Crashes

Three Are Injured in Mishap to Ontario Forestry Plane

Sudbury, Ont.—One of the Ontario Government forestry planes in charge of Aviator Smith, crashed into the waters of Lake Huron near the airport base here. There were five persons in the plane, another aviator being with Smith, and three civilians, Alex. McLeod, well-known Ford dealer of Sudbury, his daughter Myrtle, and Mrs. Clements, of Chicago, who is a summer visitor at the McLeod home. Mr. McLeod is severely injured and may not recover. Both ladies suffered severe bruises and cuts, but their condition is not dangerous. All three are in St. Joseph's hospital. The two aviators escaped unharmed.

The same story is true of Keewauw where the Conservatives elected their man by a total vote of 3,647 while the Progressives and Liberals combined polled 5,528. Now but one candidate will confront the Conservatives there, making that seat certain for King. In Marquette, an overwhelming Progressive seat, where Hon. The Great twice won by 2,000 majority, the Conservatives cast last fall 3,441 and won, though the Progressive and Liberal candidates had 4,324. Now with fusion established the Conservatives cannot hope to win that seat.

Rejects Beer By the Glass

Hon. Westminster, B.C.—By a majority of approximately 30 the voters of New Westminster rejected a proposal to allow the opening here of establishments for dispensing beer by the glass, such as those in Vancouver and other cities in British Columbia which voted in their favor in the first plebiscite held last year. At that time the proposal was voted down by a majority of about 500, and the second plebiscite was held following the filing with the provincial authorities of a petition bearing the names of the required percentage of voters.

Canada Must Be Represented

Melbourne.—If Canada is not represented at the Imperial Conference set for October 5 next, then the conference can accomplish so great results, Premier James Ryan declared in the House of Representatives here.

Mission To Britain Fails

B.C. Indians Advised To Take Up Grievance With Canadian Government

Montreal.—The three Indian chiefs from Douglas, B.C., Johnny Chittila, William Perish and Basil David, who with their interpreter, Mrs. J. C. Williams, went to London representing three tribes in the hope of interviewing King George V in connection with their rights to lands in the western province, have returned to Canada.

They report that their attempt met with failure in that the high commissioner in London advised them to return to Canada and take up the matter with the Canadian Government for settlement.

Alberta Harvest Labor

Province Will Require Thirteen Thousand Laborers This Season

Edmonton.—Thirteen thousand harvest laborers for Alberta this year is the estimate of the province's requirements as reported by Hon. Alex. Ross, minister of labor.

This is an increase of about 3,000 over last year's figures, which is accounted for in part by the better crop prospects and in part also by the fact that there will be as much labor obtainable locally.

It is not expected more than 4,000 men will be available within the province itself and more than three times that number will have to be brought in from the outside.

New Goal Is Set

Greater Diversity of Crops Is Needed in the West

Regina, Sask.—A new goal was set up by Aspin Sapiro for Saskatchewan farmers and business men to aim at. This was the rounding out of Saskatchewan as an agricultural province by the production of greater diversity in crops.

After words of unstinted praise for the Saskatchewan farmers in making incredible strides in his pool organization, Mr. Sapiro, addressing the Canadian Club here, went on to compare Canada in this respect with the United States, very much to the advantage of the former.

PROGRESSIVE AND LIBERAL FUSION IN MANITOBA

Winnipeg.—Liberal and Progressive fusion arrangements in Manitoba thus far consummated mean unquestionably the loss of four Conservative seats.

Last fall Selkirk was won by the Conservatives polling 2,592 votes, while the Progressives and Liberals combined polled 2,528. Now but one candidate will confront the Conservatives there, making that seat certain for King. In Marquette, an overwhelming Progressive seat, where Hon. The Great twice won by 2,000 majority, the Conservatives cast last fall 3,441 and won, though the Progressive and Liberal candidates had 4,324. Now with fusion established the Conservatives cannot hope to win that seat.

Canada Must Be Represented

Melbourne.—If Canada is not represented at the Imperial Conference set for October 5 next, then the conference can accomplish so great results, Premier James Ryan declared in the House of Representatives here.

PREPARE VOTERS' LISTS THE SAME AS LAST YEAR

Ottawa.—In answer to an inquiry as to the voters lists which would be used for the general election, the chief electoral officer said today: "The procedure for the preparation of lists will be exactly the same as the followed at the general election last year. The Dominion Elections Act does not provide for the use of the former Dominion lists except at by-elections, when these are held within two years after a prior Dominion election in the same electoral district. Indeed no other rule could be adopted, since to prepare the necessary copies of all the lists which would be required at a general election would take nearly three months. This difficulty was referred to in my report presented to the House of Commons last January."

It is understood that the procedure in all provinces except Prince Edward Island, Saskatchewan and Manitoba will be that the provincial lists will be used as a basis for the preparation of those to be used at the Dominion election. In rural polling divisions the provincial lists will be corrected, names being struck out and added by the rural registrars as circumstances require. In urban polling divisions all the names on the provincial lists will be transferred to the Dominion lists and in addition the urban registrars will add the names of those who apply personally for registration or on whose behalf application is made by a relative or employer when the voter is ill or away from home. The preliminary lists thus prepared by urban registrars will be corrected by revising officers who will be either local judges or substitute revising officers they nominate. In Prince Edward Island, Saskatchewan and Manitoba the procedure will be the same as in the other provinces except that there will probably be no provincial lists available for use as a basis for the work of the registrars.

Margaret Bondfield Elected

Returns to Parliament as Representative of British Labor Party

London.—Miss Margaret Bondfield, former chairman of the Trades Union Congress, is again a member of parliament.

She was elected for the Wallend division in the Labor ticket in the by-election to fill the vacancy caused by the retirement of Patrick Hastings. Miss Bondfield received 18,856 votes against 9,939 for Sam Howard, Conservative, and 4,000 for Charles Curry, Liberal.

Miss Bondfield's return to parliament increases the number of women members to six. It will give Susan Lawrence, of the Ellice constituency, an additional support on the official Labor list. Opposite side of the House will aid Lady Astor, the Duchess of Atholl and Mrs. Hilton Phillips in their efforts toward legislation for women.

That Vacation Trip

It is the lure of distance that causes us to want to go to Europe or some other far off land. How about that summer vacation? Is it really necessary to go to some far away resort to recuperate or enjoy one's self in what we call a vacation? Perhaps the railroads would not agree with us. Alberta has many beautiful haunts and fine attractions where an inexpensive trip may be planned and taken. Even our own Coleman District is complete as a resting place, where one may find respite from the workday worries of mine, store or office. Indeed, we have known of remarkable instances of rejuvenation in two weeks of back-yard mornings and front porch afternoons. It is largely a mental state. Around the corner as far as Europe if you think so; and a lot cheaper.

Business To The Bat

The summer season is here and it behooves every business man to bridge the languid gap of July and August with increased energy. Summer can be made profitable and stimulating in many lines by the taking on of a summer attitude. That attitude is alertness and wide-awakeness to all that is going on and to all opportunities that are passing by. When business goes to the bat in summer it generally makes a clean home run by fall.

We sometimes wonder whether the quiet, hard-working preacher won't have just as good chance with St. Peter as the noisy, sensational evangelist.

A combination umbrella and vanity case has been invented in Germany. They are determined that the nose shall not shine when the sun doesn't.

Bobbed hair will last another generation says a fashion expert. Deploable! There are already too many millionaire barbers in this country.

It's getting pretty hard to determine whether the movie rights to a sensation are more valuable than the hot dog privileges.

Some candidates promise to enforce the law without favor. Then when they get in they do it without fervour.

Humanity is improving. The woman who used to stand at the ironing board now sits on the school board.

You can drive an automobile to the filling station but you can't make it pay for the gas.

Truth crushed to earth will rise again, but not always the case with the pedestrian.

Now that everybody has violated some law or other let's all start over.

Education is the ability to make good thoughts strike hard enough to leave a welt.

As civilization marches on there are fewer hoboes tramping on.

Now Is The Time For Canada To Put Forth Every Effort To Secure Immigrants

When Canada launched a vigorous "open door" immigration policy at the beginning of the present century, we made our first, and only, great stride in settling the west. We succeeded chiefly because we attacked our problem intelligently and at the "flood tide." European countries, overflooded with population, were growing under dire economic pressure, and our "free-farm" propaganda carried a special appeal to the landless masses there.

It took the world's better part of half a million years to reach a population of 750 millions up to the year 1900. Food had normally been scarce and the near-starvation condition had acted as a powerful brake on natural increase according to well-known economic laws. Then came the golden age of invention, followed by rapid and cheap transportation on sea and land, which in turn led to the opening up of vast continents of virgin lands, constituting huge food reservoirs, in temperate zones overseas.

This, coupled with the increased mechanization of agriculture, relieved the pressure and automatically led to the most spectacular increase in world population that history records. Within a brief century, during the latter part of which the world wallowed in cheap food, population doubled, reaching 1,500 million in 1900. With European population at the very peak, Canada garnered her human harvest comparatively easily. But the day of colonization accomplishments is now over.

A new era has dawned. There are no more virgin worlds to conquer in temperate zones. The day of cheap food is definitely past, and presently the earth will only be made to yield more abundantly through the expensive and laborious process of intensive cultivation. Prof. East, of Harvard, after painstaking investigation, tells us that if the same fantastic birth rate should by any chance continue, the world would be on the verge of actual starvation by 1965. But economic laws are at work and we need entertain no apprehension. Vital statistics demonstrate clearly that the general birth rate is falling rapidly everywhere. Great Britain now has the lowest birth rate of any nation, even lower than that of France. Economists now predict a stationary, or possibly receding, world population beyond all shadow of doubt. In twenty years, Canada will look overseas in vain for surplus man power to develop her resources. And the birth rate of our own native stock is falling ominously. We need consult no statistics to convince us of that fact.

No Canada is essentially working against time in her present belated colonization effort. With the passing of each year the problem will be irrevocably intensified. For a few years yet the world may remain partly overpopulated with adults, but our chances to secure more people are dwindling steadily day by day. It requires no prophetic foresight to conclude that Canada's opportunity is "now or never."

And yet there is not the smallest indication that our statement can be shaken out of the present sluggardly attitude on this subject and that this fundamental and urgent national problem will be solved within nature's time limit. The stagnant, routine methods of the past are out-of-sight policies—C. W. Peterson in Manitoba Free Press.

A Death In Europe
German monarchy is dead. The fear expressed when Hindenburg was elected were without basis. When nearly 15,000,000 German voters approved the seizure of royal property, the divine right of kings is a bygone doctrine. When those who oppose such seizure do not dare vote, but beat it by abstention, there is little danger that the call for new kingshipers to rule Germany will be loud enough to be heeded.—New York World.

Students Get Toronto Fellowship
Graduates of five Canadian universities have been awarded seven special fellowships for graduate work in courses offered by the University of Toronto for the degrees of M.A. and Ph.D. It is announced. Among those who received these were: A. E. O. C. King, University of Saskatchewan; Miss A. A. Berkeley, of British Columbia.

Cleanliness is next to godliness, but just let a Chinese laundry try to locate next a church.

Cost Of Rearing Chickens

Interesting Experiment Yields Valuable Information For The Poultry Farmer

An especially interesting experiment to ascertain the rate and cost of growth in rearing chicks is chronicled in the annual report of Mr. J. A. Ste. Marie, superintendent of the Dominion experimental station at Ste. Anne de la Pointe, Quebec. Three hundred and forty chicks were used and at the end of the experiment, which lasted 26 weeks, that is from April 5 to September 26, all the chicks were still alive. The feed consumed consisted of a home-mixed grain ration, dry mash, rolled oats, eggs, skim milk, charcoal, grit, oyster shells and greens (sprouted oats) kept constantly before the birds. Fertile eggs taken from the incubator were boiled and served during a week at the rate of one egg per pound of mash, which was composed of equal parts of cornmeal, shorts, sifted oatmeal and meat meal. The mixed grains fed in the litter consisted of equal parts by weight of wheat, cracked corn and oats. When hatched the chicks weighed an average of 2 ounces each, at the end of the two months 1½ pounds, at the end of the 26th week 2.58 pounds each. The total cost of feed, as statistically detailed in the report, was \$150.85 and the cost per pound gain 14 cents. The total weight when hatched was 55.5 lbs. and at the end of the experiment 1,529 lbs.

Mr. Ste. Marie said he was doing no boasting about the United States. "I am going to a humble plea," he continued. "Never in the United States have we done anything so well and so importantly well, as this wheat pool you have built up here. It is undoubtedly the greatest single accomplishment in the history of cooperative marketing, and I stand and view it awed. Since we return to the United States three years ago I have received letters from every country in the world where wheat is grown, all asking for details of the Canadian pool and the manner in which it operates."

"It is a beacon of hope for the wheat grower the world over."

Brusied Meat Exhibit

Ultimate Consumer Should Receive Benefit of Large Scale Operations

The best way for consumer to disarm prejudice is to give the consumer the benefit of promised economies from large scale operations. They have been granted much leeway, though often there is distrust of their financial setup and doubt whether what savings are effected by them find their way to the consumer's pocket. In other words, they are being allowed to get into their hands power which may be really abused and should watch their step.—Baltim. Sun.

Heavy Shipments Being Made To Prepare For New Crop

Last year's grain is fast disappearing from western elevators and storehouses. The Canadian Pacific reports that for the period from July 7 to 11 inclusive, this year, 421,116 bushels were marketed from the Manitoba district as against 491,683 for the same period last year. Saskatchewan, 330,290 this year, against 374,365 for last year. Alberta district, 194,289, as against 258,817 last year. A total of 915,725 bushels against 1,124,856 last year, or an average of 55,621 per day, against 187,478 bushels.

Cars loaded in the Manitoba district this year are 264, compared with 147 last; Saskatchewan, 287 to 251 last year. Alberta, 164 cars against 217 for same period last year, with a total loading of 815 cars against 1,045 cars in 1925. The average per day is 158 cars against 174 last year. All of which shows that when the crop is garnered, the Canadian Pacific will be in readiness to handle it with speed.

Lured To North Country

Scientists Seeking the Nesting Retreat Of The Blue Goose

Along the shores of Hudson's Bay, Dr. George M. Sutton, of Harrisburg, Pa., head of the educational bureau of the state game commission, in company with W. Clyde Todd, curator of birds of Carnegie Museum, and John B. Semple, of Sackville, are trying to find the nesting places of the blue goose. The expedition will be gone for three months, for which time Dr. Sutton was granted a leave of absence without pay.

The trip is financed by Mr. Semple and, while other information may be obtained and various rare specimens secured, the men were lured into the north country by the call of the blue goose. It is a migratory bird spending the winters in the south and going north for the summer. So far, Seth E. Gordon, of the state game commission, said scientists have been unable to find its nesting place.

Princess Becomes Motherhood
The latest home-warming in which the King and Queen participated was the occasion of Princess Victoria taking up her abode at "Copplins" liver, Buckinghamshire, when the Princess became her own householder for the first time. The house which the Princess, who is the King's eldest daughter, taken is quite small and has nothing about it to suggest royal ownership.

Kenneth—"Poor old chap! I saw you crying over that little lot of hair. You have my deepest sympathy. But where was I?"
Ethel—"Thank's, old man. I was minus—before I became bald."

The Toll Of Forest Fires

Annual Loss to Canada Runs Into Millions of Dollars

Forest fires are again taking a heavy toll of Canada's forest wealth in Western Alberta, British Columbia and in New Brunswick. Every year the country faces this peril and this loss. The damage to the nation's timber runs into millions of dollars annually. A fire can destroy in a few minutes trees that take half a century to grow to maturity. When they are gone they cannot be replaced for another half century and their destruction is a loss not only to the individual who may own the timber land, but to the whole nation, for part of the national wealth and the national heritage has been removed.

Various organizations, notably the Canadian Forestry Association, are at work in the country preaching the gospel of "Save the Forests." They are doing valuable work in arousing public appreciation of the value of the public domain. Much work remains to be done, especially in the development of effective fire prevention and fire-fighting. The cost of such work is not an important factor provided something can be done to stop the losses from forest fires. The country can afford to spend thousands of dollars on effective fire prevention and fire control, but it cannot afford to lose millions in fire losses.—Free Press.

Combines and the Consumer

Ultimate Consumer Should Receive Benefit of Large Scale Operations

The best way for consumer to disarm prejudice is to give the consumer the benefit of promised economies from large scale operations. They have been granted much leeway, though often there is distrust of their financial setup and doubt whether what savings are effected by them find their way to the consumer's pocket. In other words, they are being allowed to get into their hands power which may be really abused and should watch their step.—Baltim. Sun.

Here's the Explanation

"What the bride is married in," remarks the Bruce Herald and Times, "is about seven times as important as what she married to."

But we fancy that is a rash conclusion. The exhibit was larger than the bride's gown than the bridegroom at the wedding day, perhaps, but we fancy the groom has been pretty well discussed before that day arrives, and that were chosen by Indians in the vicinity of the gown.—Clinton News-Record.

Famous Comic Artist Goes Fishing

Clare Briggs, continent-known creator of "Mr. and Mrs.," recently remembered that fishing time was here and with six New York colleagues came north to the Windsor Station, Montreal, for a little excursion to the Laurentians where the red and grey game trout besport themselves and incidentally furnish sport to the followers of Hank Walton. He wandered off to the lake of St. Donat Chateaufort where he stayed for a couple of weeks with results that were very satisfactory. Here you see him practicing in his New York hat prior to the trip. His fishing pole is a certain rod with cotton and a bobbin for a reel is attached and he is entirely concentrated on the job. He doesn't know what he is trying to catch, but if he does know anything he should succeed in catching it.

Scientist Casts Doubt On The Report Of Ancient Inscriptions Found In Pacific Coast Region

Well Waters From Farm Homesteads

Farmers Cannot Pay Too Much Attention To Purity of Water Supply

In his report for the year ending March 31st, 1925, the Dominion chemist, Dr. Frank T. Shutt, once more directs attention to the mistake which is frequently made of sacrificing safety for convenience in choosing the site of a well. Ideally the well, Dr. Shutt says, should be at least 150 feet from the nearest building, whether it be house, barn or stable, and the water should come from pure, open pool or other possible source of dangerous pollution.

Examination of water supplies sent to the division of chemistry at Ottawa during the year has been showing 31.5 per cent pure and wholesome, 29.7 per cent suspicious and probably dangerous, 15.6 per cent seriously polluted and 18.2 per cent saline (not potable). Although these percentages do not differ materially from those obtained in other years, the doctor states that there is gratifying evidence that farmers are paying greater attention year by year to the purity and care of their well waters.

In all cases, Dr. Shutt believes it desirable to secure a fair degree of filtration by lining the well with concrete or puddled clay to a depth of 10 feet, continuing this lining if concrete, one foot above ground level to prevent the entrance of surface wash. A good, sound watertight cover is also of importance. He further says that in a bored well tight sealing is imperative between pipe and rock and also between joints in the pipe and cover of the well.

Creamery Butter Competition

Awards Are Made For Exhibits At Recent Calgary Fair

With the standardization of creamery butter, the product as exhibited at the western fairs has become a problem for the careful grader who places the awards. So close were some of the awards at Calgary this year, that it was just by a minute fraction that some of the prizes were awarded. The exhibit was larger than ever before, and Dairy Commissioner Chas. Marker was particularly well pleased.

All provinces from Ontario west were competing. The grand championship went to the Belmont Creamery, Belmont, Man., with 29.6 points; second to Manitoba Co-operative Dairies, Winnipeg, with 29.4 points; third to Shovel Lake Creamery, with a score of 29.2 points. They win the gold, silver and bronze medals. The provincial championships were awarded as follows:

Manitoba, The Belmont Creamery; Saskatchewan, Saskatchewan Co-operative Creamery, Regina; Alberta, Central Creameries, Calgary.

L. A. Gibson, dairy commissioner for Manitoba, was judge.

St. Boniface Creamery, Winnipeg, won two firsts and one second.

P. Burns & Co., Westlock, Alta., had two firsts and P. Burns & Co., Ponoka, Alta., one first.

Maple Leaf Creamery, Landar, Man., had two firsts.

City Dairy, Winnipeg, had one first. Red Deer Dairy Products, Red Deer, Alta., had one first.

Caulder's Creameries, Saskatoon and Moose Jaw, had a second prize each.

Ignorance Is Profound

Some Americans Held Grown Ideas Regarding Conditions In Canada

The Cologwood Bulletin shows how it is sometimes necessary to go from home to learn news that is not true: A young Canadian was in a barber shop in Nebraska. When the barber found his customer was a Canadian he got confidentially sympathetic. Among other things he was anxious to know exactly how much each Canadian had to pay annually as tribute to England. He seemed to have the idea that this tribute was collected by sheer force of arms. The barber could not understand how the Canadian people endure the "tribute to the feudalism of the English kings." The Nebraskaan's query is not strange. Any Canadian who has been through the country knows the appalling ignorance of the average citizen of the States concerning Canada.

The church committee favored the purchase of a chandelier. A new member opposed it. He said: "Well, I don't want to be snubbed but who can play it after we get it?"

Some girls are like brown sugar—sweetest when unrefined.

The report that rune inscriptions relating the story of a terrific battle between a band of Norsemen and Indians in the year 1010 A.D. have been found almost within the city limits of Spokane, on the Pacific coast, seems quite incredible to Professor C. T. Curly, curator of the archaeological section of the Royal Ontario Museum.

"That a party of Norsemen in the eleventh century before Columbus discovered America, crossed the continent of North America, especially taking women with them, seems altogether improbable to me," said Prof. Curly.

"Of course nothing is impossible," added Prof. Curly, "but it is one of those things that have made overwhelming proof to accept."

"I remember that Stefansson told me of the finding of a stone with Norse inscriptions on it some time ago which would go to prove that a band of Vikings entered the Hudson's Bay before the time of Columbus and made their way down through the west to the country which now forms some of the American states of the middle west," said Professor Curly.

"At first people were inclined to scoff at the whole incident. The rune inscriptions on this stone now owned by the farmer, 'Jellies,' told of so many days' journey from the sea. People naturally thought at once that these Norsemen must have been among the bands which are supposed to have landed along the Labrador and New England coasts and have made their way right across Canada or the United States to the west. The time of the inscriptions, of course didn't work out, but when the Hudson's Bay was connected with the story it was found that the 'so many days' from the sea' mentioned on the stone inscription would do for a journey from the Hudson's Bay. Although it is so long ago that I don't recollect all the details, I believe that it is really likely genuine, and that Norsemen very likely entered the Hudson's Bay."

"But that such a band even came from the Hudson's Bay should get across the mountains to the Pacific coast seems very, very incredible to me."

Professor Curly stated that there are many people who are sufficiently proficient in rune lore to forge such an inscription as is purported to have been found by Prof. Osh Oshon. Prof. Curly told another local who told the story of an ancient Egyptian voyage around the Cape of Good Hope. A professor well versed in hieroglyphics had inscribed the story on tablets as a joke, which was taken seriously for a time.

The present story of the Spokane inscription is said to relate the heroic wanderings of a band of 24 Norse Vikings, among whom, one of whom was carrying a small baby, travelling "from east to west in 1010."

Exhausted and thirsty, they came to the spring beside the trail and camped. A party of Indians came along, found the Norsemen and immediately attacked.

"The record is supposed to tell how the party put the woman and baby on top of the great volcanic boulder and then stood at the base of the Indians. Twelve of the Norsemen were killed. Two were captured. Six of the women, also, were taken prisoners, while the woman, with the baby in her arms, was thrown from the boulder and killed."

Later on, six of the survivors returned to the spring and the scene of the battle. There they dug a grave near the rock and buried their dead. The stone, marking the burial mound, is said to be plainly visible yet, and digging operations may even be predicted.

U. S. To Increase Border Patrols

North Dakota is to have another contingent of border patrolmen placed on duty within a short time, according to information received from Washington. Steps have been taken to increase the patrols at various places on both the northern and southern boundaries of the country and to do this there will be 235 men added to the list. In North Dakota there will be five added, bringing the total up to fifteen. Manitoba is to get fifteen.

Elephants Helt Train

Passengers on the night mail train from Singapore to the Malay states were severely jolted when the train crashed into two elephants, which had strayed onto the tracks. One of the elephants was killed, but the other dashed off into the jungle. The engine was only slightly damaged, the train being able to continue to its destination.

Famous Comic Artist Goes Fishing

Clare Briggs, continent-known creator of "Mr. and Mrs.," recently remembered that fishing time was here and with six New York colleagues came north to the Windsor Station, Montreal, for a little excursion to the Laurentians where the red and grey game trout besport themselves and incidentally furnish sport to the followers of Hank Walton. He wandered off to the lake of St. Donat Chateaufort where he stayed for a couple of weeks with results that were very satisfactory. Here you see him practicing in his New York hat prior to the trip. His fishing pole is a certain rod with cotton and a bobbin for a reel is attached and he is entirely concentrated on the job. He doesn't know what he is trying to catch, but if he does know anything he should succeed in catching it.

Kenilworth—He was of the sort she was most accustomed to, only, of course, he was the super-kind that would press to his lips whatever ribbons might come to his finger tips at night, and blow them to the winds in the morning without regard for silk or cotton.

She would always have to be on her guard against Brandon. If Kenilworth carried out the threat which lurked in his calculating eyes as he let them sweep over her, she'd checkmate him, easily. Considering all pe-

If Kenilworth carried out the threat which lurked in his calculating eyes, she'd checkmate him.

sons of the other sex as hunters, Joanna felt to wondering what would be the tactics of such a man as Kenilworth who, not being by any means young, must have had divers experiences. She was brought sharply out of this reflection by the young woman with the black hair, whom Brandon had called Yvonne.

"Don't you all know it's horrid, to have to pretend," Yvonne said, sid-

ing like a gracious gift. If I remember my mythology aright. Gods, like glitzyresses, mustn't be looked in the mouth. Not even by the loveliest of their favorites. My advice to Miss Manners is to never worry over the source of her dramatic good fortune, but proceed to hire as many pipers to make music for her as she wants to pay."

Yvonne laughed a silvery little laugh that Joanna envied. "And you, Roddy, are dying to offer yourself as one of the original pipers," she accused. To Joanna she added brightly:

He's a beast of prey, this Roddy. He has the same necessities in every part that a sailor is supposed to have put away for his shore leave. You must never take him seriously. Especially when he makes furious love to you." Kenilworth raised a protesting hand, but Yvonne continued, nodding at him.

"Oh, you'll be making love to her before the evening's out." She turned again to Joanna, and informed her, with a trick of dropping her voice into the jargon of a mock confidence that Joanna resolved to practice as soon as she was home: "He'll start in with your eyes, my dear; he has a fancy that young women pin their faith in their eyes and old women on their complexions."

"Don't let her mislead you," Kenilworth pleaded. "She has me confused with someone else. She is positively libelous. I never begin with the eyes, as you say, but I go to her as I go to you, as you say."

"You see," Yvonne exclaimed. "He prepared you for his onslaught. You must tell me at once if I am right. It'll be the eyes I'm sure. They're quite pretty you know. I can fancy him ravine over them."

Brandon came to Joanna's rescue. "She will survive, even Roddy, I'm sure," he commented. "She has a most disconcerting way of putting

the proper people in the right places."

Over the coffee they talked of the money, of Graydon, and Eggleston—and quite understood Joanna's lack of make plans. As often as she could, Joanna watched Yvonne, and studied her. She was of the kind that sed-

comes to the silk counter of a department store. Joanna decided she was a bright example of the butterfly who hovers gaily over the most desirable gardens in that world to which "Miss Twenty-seven of the silks," had stood no closer than the farthest edge until tonight. And she thought that Yvonne was deliberately reaching out to her, as if to bring her within some common bond. Immediately, though, she considered if this feeling were not born of her own self-consciousness.

She concluded she would have to learn, soon, to take these new people, who lived among the hills and knew the real ways she had always known. But I don't know which one it is, the first or the last. No use asking her. She's probably forgotten."

Yvonne will do quite satisfactorily," Kenilworth assured her. "I never know her knows her well enough to forget the rest of it—if he can! Anyway, its Content—the Yvonne Content you read about. There's a husband here tonight, off in a corner somewhere. But I don't know which one it is, the first or the last. No use asking her. She's probably forgotten."

Yvonne Content! Now Joanna knew why her face had fascinated her, why it had seemed so vaguely familiar! Each manner a sensation, and each divine a greater one. She had seen her pictured regularly in the Sunday newspapers—that part of them which she really looked at, the illustrated pages. She remembered Yvonne Content divorcing a college boy she'd run away with. A college boy, who was a son of a family, or engaged to another millionaire's son, and then to an Egyptian prince. Yvonne Content at Monte Carlo, shocking English duchesses with her gown that wouldn't be allowed even in the movies—one newspaper had described them just that way. And in the most daring of beach costumes at Deauville. Then married to the famous author and promptly divorced. Yvonne Content knew her Sunday-paper history as girls of another day knew their cook books. The Paris buyer for the store had sent over a dress, one time, which he said was an exact copy of the model worn by Yvonne Content at the Longchamps races. The store designers had added four inches to the back and front and put on shoulder straps, and made it of a best seersucker number in the four hundred dollar class. And she, Joanna, yesterday morning "Miss Twenty-seven," had talked with her; had talked and held her own with her!

"I told you really mean that her husband actually is here, tonight?" she asked her companion.

"One of them. If I spot him I'll give you a nudge. He's with a new name. Yvonne never knew him, but she knows, to see what she'll say she's the kind that has golden weddings."

(To be continued)

While a pretty woman may not be to be briny, a brainy woman always wants to be pretty.

You have to have a pull to get along in this world. Ask any fellow who has tried to make the varsity crew.

ECZEMA IN FORM OF RASH Lasted About a Year. Healed by Cuticura.

"My scalp started to get red and itchy and had a burning feeling. Later eczema broke out in the form of a rash and spread over my face and body. It was itchy all the time, and my woolen clothing made it worse. My face was disfigured, and my hair fell out and got dry. The trouble lasted about a year."

"I began using Cuticura Soap and Ointment and after using one cake of Cuticura Soap and one cake of Cuticura Ointment I was healed." (Signed) Miss Alice Bickell, R. R. 3, Woodville, Ont.

Daily use of Cuticura Soap, Ointment and Cuticura to prevent skin troubles.

Extend Area For Buffalo

Range in Northwest Territories Increased By 6,500 Square Miles

The great area of natural buffalo range partly in the Northwest Territories and partly in Alberta, known as Wood Buffalo Park, has just been increased by the addition to its southern portion of 6,500 square miles. The park now extends 175 miles from north to south and 150 miles from east to west in its widest point, with a total area of 17,900 square miles.

This added area, it is stated, contains some of the best buffalo grazing lands in the north. A number of animals from the 1,824 shipped north in the summer of 1925 from Buffalo National Park at Wainwright spent a portion of last winter in this locality, returning north to the main herd in the spring. These animals were not mated while outside the park boundaries, but as the supervision of the wardens is more complete when within established limits it was thought advisable to extend the park to take in this eminently suitable territory.

Provision has been made in the park regulations to permit Treaty Indians, who hunted other game in that area in the past, a continuation of that privilege and to allow those half-breeds and whites, who have in the past hunted and trapped in the recently added portion to continue as heretofore under permit from the park superintendent. The maintenance of the buffalo in any way is of course not permitted.

Triumph For Telephone

Returns From Alberta Provincial Election Handled By Phone

For the first time in Canadian election history, all the results of the recent provincial election in Alberta were handled by telephone, instead of by telegram. This was a triumph for the Alberta Government telephone department. In less than three hours after the close of the polls the results in all of the 2,430 polls in the province, including the north county, were known, with the exception of a few from the most isolated polls, the first choices or elected candidates had been tabulated in every constituency.

Nearly 300 people in as many telephone exchanges in the province were engaged in the work of collecting the returns. One hundred and eighty-five thousand miles of rural and long distance wire carried the news, covering the province with a vast network of telephone communication. Special telephone compiling operators were placed in the daily newspaper offices in Edmonton, Calgary and Lethbridge.

At Calgary having 16 riding wires at Lethbridge handling six ridings. The returns were handed to the newspapers as soon as received, and conveyed over Canadian Press wires. In five constituencies the entire work of compiling all returns was handled by the telephone department.

Minard's Liniment for Sore Feet

A Modern Cinderella

London Salsbery Is Society Debutante

A Cinderella in real life has been found by London society.

Miss Dorothy Knaggs, daughter of Lord Knaggs, was presented as a society debutante at the most recent brilliant Royal Court at Buckingham Palace. She was sponsored by Lady Cadham, her aunt and wife of the chairman of the Great Anglo-Persian Oil Company.

It has now been discovered that at 8 o'clock on the morning after the fact, Miss Dorothy Knaggs, salsbery, presented herself for duty at a big breakfast table. Some of her staff workers knew anything about the presentation.

"Jameson certainly had a big bump on his head when he came to the office yesterday."

"Ah, he told me that the girl he married was a brick."

The London Zoo has a white elephant.

It isn't that that lends enchantment to spring.

Minard's Liniment for all pains.

Cancer Research

British Empire Cancer Campaign

Publicizes Annual Report

The annual report of the British empire cancer campaign gives the results of the investigations by the workers at the Cancer Hospital into the causation of cancer.

It was found that cancer producing tars and poisons were largely those which had been heated in manufacture to a very high temperature. Some things occur at these high temperatures which effect a change in the substances subjected to them and endow them with a mysterious cancer-producing power.

So far, no light has been thrown on the nature of this change. There seems to be very little in the idea that tar produces cancer because of or by means of the arsenic contained in it.

The workers at the Cancer Hospital believe that they have disposed of the idea that the presence of one cancer producing agent increases the growth of others. They have not so far been able to find any support for the virus theory of cancer causation as propounded last year by Dr. Gye.

Dr. Jameson's researches at the Later Institute are declared to be of the most promising character. He has obtained an antiserum which causes cancers in rats to disappear, but he has found it impossible to make any application of it as yet to human beings.

An interesting communication in the report comes from Professor R. T. Leiper, who by a series of careful studies disposed of the theory of "cancer houses." He acquires the cockroach as a carrier of the agents of human cancer.

An American's Belief

Gentleman From Indiana Thinks

Edmonton District Finest in America

John J. Judy, formerly of Judyville, Indiana, owner of the famous "Dan Patch" and "Judy Patch," pacers, head of a chain of 25 general stores, bank president and newspaper publisher, but now a citizen of Edmonton, living at 1420 106th Street, believes no other place is as good as the province of Alberta according to the Edmonton Journal.

In 1907 he traded a Dan Patch colt for a half section of farm lands near Wetaskiwin, Alberta. A little later he traded Judy Patch for a section of land, both unused. It was not till 1924 that he came to the Edmonton district to look over his land.

"I came, I saw and I was conquered," he told the Journal. "I farmed it two years and then sold it. Now I'm an Edmonton citizen and I'm here because I think this district is the finest on the North American continent, bar none."

"When I came west two years ago it was my first trip," he said. "Now I'm here for keeps."

Mr. Judy has succeeded in growing outdoors in Edmonton some of the finest crops of strawberries ever seen in the city.

The Friend of All Sufferers.—Dr. Thomas' Electric Oil is a valuable remedy for all those who suffer pain. It holds out hope to everyone and relieves by stilling suffering everywhere. It is a liniment that has the blessing of half a continent. It is on sale everywhere and can be found wherever required for.

Little Helps For This Week

And thou shalt be secure, because there is hope—Job 12, 13.

And, as in sparkling majesty a star Glides the bright summit of some gloomy cloud, Brightening the half-veiled face of heaven afar: So when dark thoughts my boding spirit abroad, Sweet Hope! celestial influence roun me shed, Sweating thy silver pinions o'er my head.

—John Keats.

Hope is the cordial of the human heart.

—Robert Burns.

Hope never hurt anyone, never yet hindered with duty; nay, always strengthens to the performance of duty, gives courage, and clears the judgment. Saint Paul says, "We are saved by hope."

—George MacDonald.

Swiss Young Thing: "Why are you running that steam rolling thing over that field?"

Farmer: "I'm going to raise mashed potatoes this year."

Village Curate: "They tell me you have a model husband, Mrs. Briggs."

Mrs. Briggs: "Yes, but he isn't a workin' model."

The magat, a Mexican tree, supplies from its bark a thread three times as strong as ordinary cotton.

Baldwin Deluged With Pipes

Tobacco pipes, new and old, cheap and expensive, of every conceivable design and variety, have been shown upon Stanley Baldwin, the prime minister. In such numbers that it has become a problem at No. 10 Downing Street as to what is to be done with them.

SAVE THE CHILDREN

In Summer When Childhood Ailments Are Most Dangerous

Mothers who keep a box of Baby's Own Tablets in the house may feel that the lives of their little ones are reasonably safe during the hot weather. Stomach troubles, cholera infantum and diarrhea carry off thousands of little ones every summer, in most cases because the mother does not have a safe medicine at hand to give promptly. Baby's Own Tablets relieve these troubles, or given occasionally to the well child they prevent their coming on. The Tablets are guaranteed by a government analyst to be absolutely harmless even to the newborn babe. They are especially good in summer because they regulate the bowels and keep the stomach sweet and pure. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Woodrow Wilson Portrait

A portrait of the late President Woodrow Wilson, auctioned off with those of other statesmen painted at the Paris peace conference by Sir William Orphen, of the Royal Academy, London, has brought \$12,000, the highest figure bid at the sale.

Fresh Supplies in Demand.—Wherever Dr. Thomas' Electric Oil has been introduced increased supplies have been ordered, showing that wherever it goes this excellent Oil impresses its power on the people. No matter in what latitude it may be found its potency is never impaired. It is put up in most portable shape in bottles and can be carried without fear of breakage.

As Much As He Knew After the household has been completely disorganized for three weeks, the society reporter refers to it as a "quiet home wedding."—Detroit News.

The Study of Stringed Instruments as a Power in Education

(Continued from last week)

The piano is being taught universally not as formerly, to give girls and boys (the boys were mostly wise enough to kick against it) what was called an "accomplishment," but for the sake of the study of musicianship. The stringed instruments (violin, viola and cello) should be taught for the same purpose. Any music work may be studied as music, simply, by being adapted to the piano. But then a symphony is no longer a symphony; a stringed quartet is no longer the lovely, the beautiful thing of two fiddles, a viola and a cello. Thanks to the gramophone, now an instrument of real beauty, we may sit by the hour hearing the greatest quartet played by the renowned artists of the world, but, deep as the joy is, it is as nothing compared to the experience of oneself playing in such a work. Here is the ideal in music—the stringed quartet. One who has not intimately experienced it can have no conception of its beauty and its fascination; children should be given every opportunity of hearing it. But this is not enough. They should be encouraged to study with the aim of participating in the playing of stringed quartets. Boys and girls need not advance very far before they can get the first glimpses of this wonderful world of sound, and, while they may continue to hear as much as possible the playing of artists, they will learn from their own efforts what nothing else can teach them.

Where exceptional talent is discovered that highly gifted one may develop into a solo artist, but he will never lose his first love of quartet playing, and to lead a quartet is a greater art than solo playing.

Coming to the purely educational aspect of the matter, let us consider first the value of technical study of the individual instrument. It is of course, understood that there has been already laid a foundation of elementary musicianship.

In the early lessons the young pupil will be called upon to exercise self control, patience and intelligent observation. Children very considerably in natural ability to exercise these powers, but if the teacher knows his business, these will be neither strain or weariness to the pupil, but only a lively interest and the happiness of achievement at the end of each lesson. As the lessons proceed the contrast will be stronger, patience will be unconscious because inspired by interest, and observation will become increasingly a habit. When the first knowing exercises begin there must be control with muscular and nervous relaxation. Here the pupil has to learn to make the necessary effort, which, however, should be almost unconscious, and at the same time not to stiffen his muscles, but to relax them. This is generally easy for children but terribly difficult for grown up people who have not early learned the necessary lesson.

(Continued next week)

E. W. Beatty, Chairman and President of the Canadian Pacific Railway, left recently for England and the continent, for a trip which is to last several weeks. Mr. Beatty, accompanied by W. R. Macdonald, Vice-President of Traffic, will complete arrangements for the building of the company's two new ocean liners for the Atlantic route while in England.

One minute after midnight of May 31st, 1914 miles of the Lyndonville subdivision of the Boston and Maine Railway was taken over on lease by the Canadian Pacific Railway. Close to the international border and running through Vermont, the railway line will tap rich consuming and producing sections of Connecticut, Massachusetts, New Hampshire and Vermont.

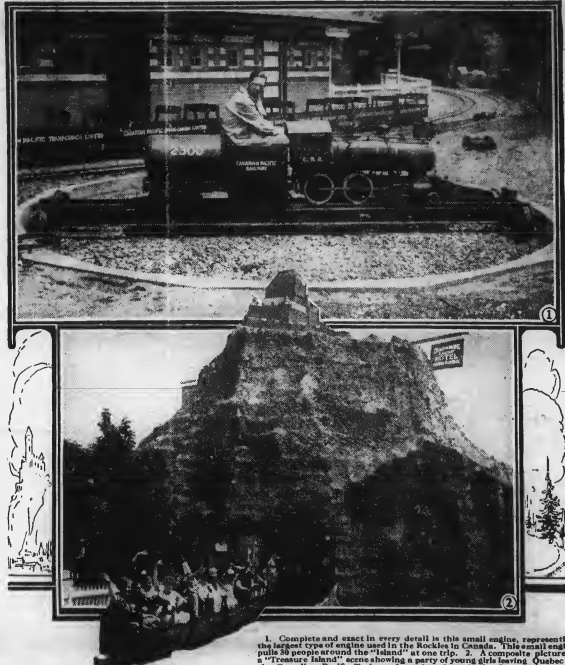

Alberta Man Honoured

Heading the list of 545 entrants throughout the dominion who sat

for the civil service examination for the position, Clifford S. Bissett, a graduate with honours of the University of Alberta, who gained a

distinguished record overseas during the war, has been appointed Canadian trade commissioner to South Africa.

Treasure Island is Mecca for Children

1. Complete and exact in every detail is this small engine, representing the latest type of engine used in the Rockies to Canada. 2. A composite picture of the "Treasure Island" scene showing a party of young folk having, Quebec on the Canadian Pacific train and through the Connaught tunnel.

Located in the Canadian Rockies. At top of cliff is a miniature of one of Canada's finest hotels, the Chateau Frontenac. Limited" train which is pulled through a replica of the Canadian Pacific Rockies by a small puffing engine only four feet long, but strong enough to pull 30 people. The engine driver is L. Terrence Holder, the twenty-one year-old son of one of England's wealthiest families who prefers this job to an Oxford career.

One gets on the train at the Palais Station, Quebec, just below the magnificent Chateau Frontenac, and passes through Quebec and Ontario provinces and enters the prairies in less than no time. When Banff is reached the train stops to allow passengers to see the Banff Springs Hotel and the beautiful Bow Valley. Westward it speeds through the Canadian Pacific Rockies, some 800 feet long, the tallest towering 74 feet high and built of sheet iron and plaster, and dashes into Connaught tunnel, thence on to the Coast, where one sees Vancouver Harbour, the Straits of Georgia and picturesque Victoria.

More than half a million people rode on the little Canadian Pacific Railway at Wembley last year, and among its distinguished passengers were the King and Queen and the Duke and Duchess of York.
